

## H<sub>2</sub> Plant Engineering and Fuel Systems

Easy handling and perfectly coordinated functionality - at HoKon we design and manufacture products according to these aspects. In consultation with our design department, we create elements with virtually no limits. We take your wishes and requirements into account when selecting different closure systems, lengths and widths of hinges and tightening straps as well as when selecting materials.

We solve your problem to the millimetre, regardless of the quantity.

On the following pages of this brochure, we would like to give you an insight into what is possible with your wishes and our know-how.

We will be happy to advise you!

As an internationally active manufacturer and trading company, our portfolio includes all products that are essential for plant construction. These can be special hinges and turnbuckles for offshore wind farms and plants, or tension bands for fastening pipelines and measuring systems. In the field of plant construction, we equip manufacturers with hinges, tensioning bands, turnbuckles and handles to enable easy handling on the plants. All products can be developed and produced individually to meet the customer's requirements.

## Advantages:

- ✓ Full range with almost 30000 articles
- ✓ Individual adaptation to customer requirements
- ✓ Development and design with the customer
- ✓ From samples to small series to series production possible

We offer our customers the products that are essential for tank and transport systems as well as refueling and charging infrastructure. Here, it's all about custom-fit solutions that we develop, design and manufacture in-house for our customers, regardless of the quantity. Our tension straps, hinges and twist locks in particular are used in tank systems to ensure the easiest possible handling.

We hold what we lock.

### Advantages:

- ✓ Assemblies according to customer requirements
- ✓ Full range individually adaptable to your wishes
- ✓ Development, design and manufacture according to customer requirements
